About me

I am a teaching assistant at the University of Information Technology, VNU-HCM, and an AI researcher with the IEC Research Group, working on AI model security, multimodal learning, and machine unlearning. I am currently pursuing an MSc in Artificial Intelligence (expected to complete in 2026) at the University of Science, VNU-HCM, where I also earned my BSc in Artificial Intelligence. My research has led to five published papers and one accepted conference paper, including two Q1 journal articles (one as first author) and a co-first-author paper at a CORE Rank B conference. I aim to develop trustworthy and robust AI systems and am seeking a PhD position to continue my research in this area.

Education

MSc in Artificial Intelligence **Ho Chi Minh City, Vietnam**
University of Science, VNU-HCM *2025–Present*

- Current GPA: 9.13/10 (or 3.86/4.0)
- Thesis: *Model Inversion Attacks in Machine Unlearning* (in progress; expected defense: December 2026).

BSc in Artificial Intelligence **Ho Chi Minh City, Vietnam**
University of Science, VNU-HCM *2021–2025*

- GPA: 9.08/10 (or 3.87/4.0); Degree classification: **Excellent**
- Ranked among the **Top 3** students in the first graduating cohort of the Artificial Intelligence program (June 2025).
- Selected to represent the first graduating cohort of the Artificial Intelligence program at the commencement ceremony.
- Thesis: *Building a Multimodal Deep Learning Model for Rumor Detection on Social Networks*.

Experience

University of Information Technology, VNU-HCM **Ho Chi Minh City, Vietnam**
Teaching Assistant *Oct 2025–Present*

- Teach undergraduate courses including *Artificial Intelligence for Networking and Communications*, *Advanced Internet of Things Technologies*, *Parallel Computing*, and *Introduction to Computer Networks*.
- Contribute to research projects with the IEC Research Group, focusing on AI model security.
- Support academic and administrative activities, including exam proctoring, grading, and organizing student activities.

IEC Research Group **Ho Chi Minh City, Vietnam**
Research Assistant *Jan 2023–Present*

- Conduct research on multimodal learning and AI model security, including rumor detection, dropout attacks, bit-flip attacks, and machine unlearning.
- Developed a graph neural network for rumor detection, a defense against dropout attacks, and an evaluation of bit-flip attacks in collaborative inference systems.
- Analyze research findings, present results, and prepare papers for international journals and conferences.

Voyager IT Inc. **Ho Chi Minh City, Vietnam**
Ruby on Rails Developer Intern *Nov 2022–Jan 2023*

- Developed features for an e-commerce project using Ruby on Rails, Bootstrap, PostgreSQL, and Docker.
- Contributed to company projects by working with Rails APIs, implementing social login and authentication, and writing documentation.
- Participated in internal technical presentations and learned technologies such as React.js and FastAPI.

Research interests

Machine Learning, Deep Learning, AI Model Security, Machine Unlearning, Knowledge Editing, Multimodal Learning.

Publications

Journal publications

[J-1] **Hoang-Trung Le-Pham**, The-Phong Nguyen, Anh-Duy Tran, and Kim-Hung Le. *"MTAS: A Temporal-Aware Multiview Graph Attention Framework for Early Rumor Detection on Social Media"* – **Information Fusion**, vol. 126, Art. no. 103598 (2026). Q1; Impact Factor: 17.4.

[J-2] Cao Qui, **Hoang-Trung Le-Pham**, and Kim-Hung Le. *"ODFU: Off-Diagonal Correlation-Aware Federated Unlearning for Dropout Attack Defense in Federated Learning"* – **Array**, vol. 31, Art. no. 101065 (2026). Q1; Impact Factor: 5.3.

Peer-reviewed conference publications

[C-1] Huy-Cuong Nguyen, **Hoang-Trung Le-Pham** (co-first author), Xuan-Ha Nguyen, Khanh-Hoi Le-Minh, and Kim-Hung Le. *"A Dual-Layer Defense Mechanism for Dropout Attack in Wireless Link Estimation"* – **17th International Conference on Computational Collective Intelligence (ICCCI 2025)**, pp. 169–183, Springer (2026). CORE 2021 Rank B.

[C-2] Nhu-Y Tran-Van, **Hoang-Trung Le-Pham**, Huy-Tan Thai, and Kim-Hung Le. *"Investigating the Vulnerability of Deep Neural Network to Bit-Flip Attacks in Collaborative Inference Systems"* – **The 14th Conference on Information Technology and its Applications (CITA 2025)**, pp. 683–695, Springer (2026).

[C-3] Duc-Tai Nguyen, Tra-My Le-Doan, **Hoang-Trung Le-Pham**, and Kim-Hung Le. *"Dropout Attacks on Knowledge Distillation"* – **2025 International Conference on Multimedia Analysis and Pattern Recognition (MAPR)**, pp. 1–6, IEEE (2025).

[C-4] **Hoang-Trung Le-Pham**, Hung Phuoc Truong, and Kim-Hung Le. *"FLIA: Forgotten Label Inference Attacks Against Machine Unlearning in Smart City Systems"* – **2026 International Conference on Advanced Technologies for Communications (ATC)**, Special Session on *Smart Transportation and Smart City Systems* (accepted).

Research projects

- **Investigating Model Inversion Attacks in Machine Unlearning**
  - Funding body: University of Information Technology, VNU-HCM.
  - Role: Project Leader.
  - Period: Dec 2025–Dec 2026.

Skills

- **Programming & Software:** Python, Ruby, C++, SQL, Ruby on Rails, Bootstrap, FastAPI, Flask, and Docker.
- **Machine Learning & Deep Learning:** Supervised and unsupervised learning; scikit-learn, NumPy, pandas, TensorFlow, and PyTorch.
- **AI, Computer Vision & NLP:** Text classification, sentiment analysis, machine translation, auto-correction, retrieval-augmented generation, chatbot development, digital image and video processing, object detection, segmentation, basic tracking, and OpenCV in C++ and Python.

Awards, Honors, and Recognition

2025: Certificate of Merit from the Director of VNU-HCM for academic achievement.

2025: Featured by *HCMUS*, *Dan Tri*, and *Education and Times* for academic and research achievements as a graduate of HCMUS's inaugural Artificial Intelligence cohort.

2024: Ranked among the top three teams in Vietnam at the RMIT GenAI and Cyber Security Hackathon.

2022–2024: Exemplary Young Communist Party Member.

2022–2024: Outstanding Youth Following Ho Chi Minh's Teachings (awarded in 2022, 2023, and 2024).
2023: First Prize (team category), 12th Youth Competition on Marxism-Leninism and Ho Chi Minh Thought.
2022–2023: University-level "Five-Good Student" title.
2021: Third Prize, Tien Giang Provincial Technical Innovation Contest.

Languages

- **English:** IELTS Academic 6.5
- **Vietnamese:** Native
